TODAY

**WHAT'S BEST FOR THE PLANET
IS BEST FOR YOUR COMPANY**

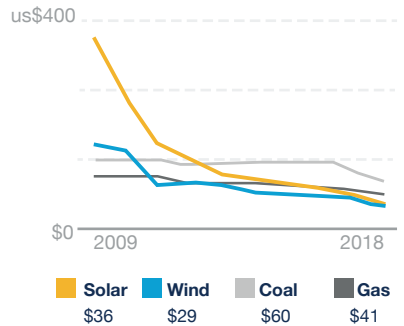

#RevolucionRenovable

COMMUNITIES AND ECOSYSTEMS

Today, it is possible to generate electricity while, at the same time, generating a positive impact in the communities in which we operate. Renewable energy projects bring jobs, new infrastructure, as well as social and environmental programs.

LOWERING PRICES

Source: Lazard

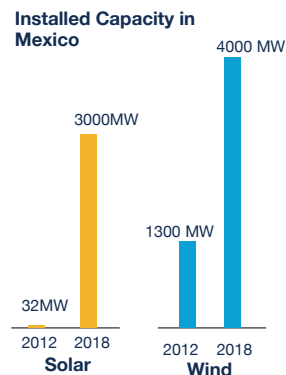

In recent years, generating costs for renewable energies have dropped considerably relative to other sources of generation.

TOWARDS SELF-SUFFICIENCY

With renewable energies, Mexico is achieving energy self-sufficiency.

We are one of the countries with the best solar resources in the world, and we have areas with optimal winds for electricity generation.

We have made enormous strides, but there is still a long way to go. Let's keep moving forward.

OUR PROJECTS

We have a wide-ranging portfolio of solar and wind projects to fulfill the needs of clients of any size.

TOTAL GENERATION
810 MW
OF ZERO-EMISSIONS ENERGY

ENOUGH TO POWER THE ENTIRE STATE OF CAMPECHE

IT OFFSETS:
1,750,000
TONS OF CO2 PER YEAR

EQUAL TO PLANTING
50,000
HECTARES OF RAINFOREST

AND REMOVING
380,000
CARS FROM CIRCULATING
